

WeeklyReport_2018-06-17_06-24_E

I think I don't have self-control this week and watch too much World Cup. Next week I will attend the Graduation Party, maybe I will come back to Lab in Thursday.

Progress

1 Regular

- write problem on codeforces.com

haven't done the atcoder

- study the d3 on tutorialpoint.com (50%)
- read visualization to 3 Chat
- just read 1 page in PRML

2 Group

- read the GraphLayout code

I understand the code except the visualization.cpp

- build the OGDF lib
- study the knowledge of LSTM
- write the init code of LSTM, can predict the time list
- through research, now can predict different curve in only one model
- next week I will research the more complexity condition

3 Paper

- DRGraph: An Efficient Graph Layout Algorithm for Large-scale Graphs by Dimensionality Reduction

Recent perspective

--	--	--

Work	deadline	now
research LSTM to a stable theory	Friday	
atcoder, 5 problems on ACM	Saturday	
read PRML 5 pages	Sunday	
read out the js on tutorialpoint.com	Wednesday	
read visualization to 4 Chat	Sunday	

Long-term perspective

Work	deadline	now
CHI contribute	9.17	research LSTM
read out the PRML	this year	page.5
